

## Important: COVID-19 Vaccine Information

We want to ensure that you stay informed about the developments surrounding the COVID-19 vaccine. Below you will find the latest information (as 8/16/2021) provided by the Centers for Disease Control and Prevention (CDC), including answers to some of the most frequently asked questions (FAQs). If you have additional questions or concerns, don't hesitate to reach out to us at **800.648.7563**.

### Key Things to Know About COVID-19 Vaccines

#### What you Need to Know

**COVID-19 vaccines are effective at helping protect against severe disease and death from variants** of the virus that causes COVID-19 currently circulating, including the Delta variant.

If you are fully vaccinated you can resume many activities that you did before the pandemic, but you should wear a mask indoors in public if you are in an area of substantial or high transmission to maximize protection from the Delta variant and possibly spreading it to others.

You may have side effects after vaccination. These are normal and should go away in a few days.

Learn how to find a COVID-19 vaccine so you can get it as soon as you can.

#### What we are Still Learning

-How well the vaccines protect people with weakened immune systems, including people who take medicines that suppress the immune system

-How long COVID-19 vaccines protect people

-How many people have to be vaccinated against COVID-19 before the population can be considered protected (population immunity)

-How effective the vaccines are against new variants of the virus that causes COVID-19

#### Availability of Vaccines

Vaccines are widely accessible in the United States and are **available for everyone at no cost**. Learn more about how COVID-19 vaccines get to you.

Many doctors' offices, retail pharmacies, hospitals, and clinics offer COVID-19 vaccinations. Parents, check with your child's healthcare provider about whether they offer COVID-19 vaccination.

**Find a COVID-19 Vaccine:** search vaccines.gov, text your ZIP code to 438829, or call 1-800-232-0233 to find locations near you.

#### Cost of Vaccines

The federal government is providing the vaccine **free of charge** to all people living in the United States, regardless of their immigration or health insurance status.

#### COVID-19 Vaccines Are Free

#### Effectiveness

Studies show that COVID-19 vaccines are effective at keeping you from getting COVID-19. Getting a COVID-19 vaccine will also help keep you from getting seriously ill even if you do get COVID-19. Learn more about the benefits of getting vaccinated.

COVID-19 vaccines teach our immune systems how to recognize and fight the virus that causes COVID-19. It typically takes 2 weeks after vaccination for the body to build protection (immunity) against the virus that causes COVID-19. That means it is possible a person could still get COVID-19 before or just after vaccination and then get sick because the vaccine did not have enough time to provide protection. People are considered fully vaccinated 2 weeks after their second dose of the Pfizer-BioNTech or Moderna vaccine, or 2 weeks after the single-dose Johnson & Johnson Janssen vaccine.

We are still learning how well COVID-19 vaccines protect people with weakened immune systems, including people who take medicines that suppress the immune system. We're also still learning how long COVID-19 vaccines protect people.

If you have a medical condition or are taking medicines that weaken your immune system, you should talk to your health care provider. You may need to keep taking all precautions to prevent COVID-19 disease.

#### Safety

Millions of people in the US have received COVID-19 vaccines, and these vaccines have undergone the most intensive safety monitoring in US history. This monitoring includes both established and new safety monitoring systems to make sure that COVID-19 vaccines are safe. COVID-19 vaccines cannot give you COVID-19. Learn more to bust myths and learn facts about COVID-19 vaccines.

CDC has developed a new tool, **v-safe**, to help us quickly find any safety issues with COVID-19 vaccines. **V-safe** is a smartphone-based, after vaccination health checker for people who receive COVID-19 vaccines. Learn how the federal government is working to ensure the safety of COVID-19 vaccines.

#### Variants and Vaccines

FDA-authorized COVID-19 vaccines protect against Delta and other known variants. These vaccines are effective at keeping people from getting COVID-19, getting very sick, and dying. People who are vaccinated are also less likely to spread COVID-19. We don't know how effective the vaccines will be against new variants that may arise.

### Additional COVID-19 Vaccine FAQs

#### How much will the COVID-19 vaccine cost?

There will be no cost to members for the COVID-19 vaccine.

#### How many doses of the COVID-19 vaccine do I need?

The Moderna and Pfizer/BioNTech vaccines, which are mRNA vaccines, require 2 doses. The Johnson & Johnson vaccine, which is a viral vector vaccine, is a single dose vaccine.

#### Are there special considerations on who should get the COVID-19 vaccine?

Everyone 12 years of age and older is now recommended to get a COVID-19 vaccination. CDC now recommends that people whose immune systems are compromised moderately to severely should receive an additional dose of mRNA COVID-19 vaccine after the https://www.cdc.gov/coronavirus/2019-ncov/vaccines/recommendations/immuno.html two doses. For more information on who qualifies for an additional dose visit https://www.cdc.gov/coronavirus/2019-ncov/vaccines/recommendations/immuno.html

#### If I am pregnant, can I get a COVID-19 vaccine?

Yes, COVID-19 vaccination is recommended for all people 12 years and older, including people who are pregnant, breastfeeding, trying to get pregnant now, or might become pregnant in the future. You may want to have a conversation with your healthcare provider about COVID-19 vaccination. Learn more about vaccination considerations for people who are pregnant or breastfeeding.

#### Is it safe for my child to get a COVID-19 vaccine?

Yes. Studies show that COVID-19 vaccines are safe and effective. Like adults, children may have some side effects, but they should go away within a few days. Although fewer children have been sick with COVID-19 compared to adults, children can be infected with the virus that causes COVID-19, can get sick from COVID-19, and can spread the virus that causes COVID-19 to others.

#### What can I do to help protect myself from getting COVID-19?

If you have not been fully vaccinated, continue to wear a mask, stay 6 feet apart from others who don't live with you, avoid crowds, and wash your hands often. If you are fully vaccinated, visit the CDC's website to see recommendations on what activities are safe to resume.
