Preventive Care Guidelines

This list will be continually updated to reflect both new recommendations and guidelines and revised or removed guidelines. However, those revised specified services must be covered for plan years that begin on or after the date that is one year after the date the recommendation or guideline was/is issued. For example, if updated recommendations are issued in June 2014, benefits would not be updated to reflect those changes until 01/01/2016.

In accordance with Health Care Reform, for **In-Network Providers**, **Non-Grandfathered Plans** must provide benefits for and prohibit the imposition of cost-sharing requirements (including co-payments, co-insurance or deductibles) with respect to:

1.	**Evidence-based items or services that have in effect a rating of "A" or "B" in the current recommendations of the United States Preventive Services Task Force (USPSTF) with respect to the individual involved.**
2.	**With respect to women including prenatal, evidence-informed preventive care and screening, provided for in the comprehensive guidelines supported by Health Resources and Services Administration (HRSA).**
3.	**With respect to infants, children and adolescents, evidence-informed preventive care and screenings provided for in guidelines supported by HRSA and Bright Futures.**
4.	**Immunizations for routine use in children, adolescents and adults that have in effect a recommendation from the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC) with respect to the individual involved.**

Below is the Preventive Care Services, along with coding requirements, to be paid at no-cost sharing for **Non-Grandfathered Plans** only. (Please note in order to pay preventive, the ICD-9 diagnosis codes must be listed on the line item submitted). If a recommendation or guideline does not specify the frequency, method, treatment, or setting for the provision of that service the plan can use reasonable medical management techniques to determine any coverage limitations.

Effective 10/01/2015 any claims incurred after 09/30/2015 will require that they be billed using ICD10 codes.
